Notify

## For businesses who care about keeping people and the environment safe

Notify lets you see what's happening in your workplace—in real time

Digitalise your incident reporting, audits and inspections, and risk assessments to empower your organisation to develop a smart, scalable and simple safety culture.

Choose from Incident Management with Notify IM, Audits and Inspections with Notify AI, or Risk Assessments with Notify RA all underpinned by our Actions Tracking and Advanced Dashboard capability. You can even pull everything together in one place and use all of the modules to drive productivity and efficiencies across your entire organisation. The choice is yours.

People first—with Notify

We are focused on using technology to increase employee engagement around safety, health, environment, and quality compliance. To do this, we developed our mobile-first SHEQ software platform which is always on, always available and designed to work the way you do.

With Notify, you can digitalise and automate your health, safety, environmental and quality processes demonstrating your commitment to your people and the world in which we live. Used by all sizes of companies in over 100 countries worldwide.

Notify IM | Incident Reporting and Management

Notify IM makes it quick and easy to digitally capture health, safety and environmental events in real time, tracking actions and investigations to completion.

Notify RA | Risk Assessments

Notify RA allows your teams to embrace collaboration in assessing and managing risks across your business, improving the safety of your people and the environment.

Notify AI | Audits and Inspections

With Notify AI you can digitally transform the way you create safety audits, inspections and checklists, providing actionable insights whilst on the move, from any mobile device.

Actions Tracking and Advanced Tracker Dashboard

Each Notify module is underpinned by the Actions Module and Action Tracker Dashboard which allows you to filter your results by site, division, and incident type enabling you to effortlessly compare the performance of departments, locations or even countries.
